FINANCE. As is usual at this time of the year, banks are very quiet places, but they are doing well with. Let them remember that for the last three years the English have been running prevailed in the spring and early summer restrained the quantity of paper offered to the banks, but now the demand for money has become satisfactory to the banks, and there are prospects that they may yet be run closely to the extent of their resources. The prevalent rate for unexceptionable paper on collaterals is 6 per cent. Capital is seeking investment, and any local stocks or securities in good repute find ready buyers, but sellers are very few, and therefore little is doing. The New York Bulletin reports "an improved tone to the share speculation, and prices closed at a considerable advance from latest prices. WASHINGTON, July 18.—The Local Inspectors at New Orleans report that the cause of the explosson on board of the John W. Hanna, June 8th, is traceable to a defective iron plate in the forward ring of the collapsed flue. The report says that the testimony taken shows the position of 'the defective iron was such that the defect could not be discovered after the boiler had been constructed. The engineers are acquitted of all blame.
